

## Warranty and Disclaimer

**Within One year after the purchase date, the original buyer** may return any XKGLOW products that has one or more LEDs that fail to illuminate, due to a defect in materials or workmanship.

Installation of this product must be performed by a licensed professional. Should the failure of the product be the result of damage occurring as a result of improper installation, alteration of the product or an act or omission on the part of the consumer, this warranty is void. XKGLOW Lighting shall not be responsible for any consequential damages which arise from the use and/or installation of the product. If the kit is installed in any manner other than specified, XKGLOW Lighting reserves the right to deny any warranty claims at the discretion of the technical support department. Any product return must include the original packaging, invoice number and a statement of the alleged defect. Upon receipt of the returned product, the company will test the product for defect. If the results of the testing do not support the warranty claim, do not reveal any defect or indicate consumer negligence in the installation and handling of the product, then the product will be returned to you and you will be charged a reshipping fee. If the product is returned from an address within the continental United States, within the first 30 days after purchase, and is found to be defective, XKGLOW Lighting will exchange or refund the original purchase expense. This offer does not extend to the cost for shipping charges on any international packages.

## Additional Disclaimer Terms

Please check your local and state laws for the proper use of this product.

- Improper installation of electrical products such as lighting may cause damage to any vehicle or device to which the improperly handled or installed lighting is attached.
- Improperly installed product may cause electrical injury to persons.
- It is recommended that the kit should be installed by a licensed professional.
- XKGLOW assumes no liability for the installation of the product.
- Warranty or liability will not exceed the product purchase price, which shall be buyer's sole and exclusive remedy.

## Return/Exchange Procedure

1. Email [[xk@xkglow.com](mailto:xk@xkglow.com)] to notify us of the product issue as well as the item number and name of customer on invoice.
2. We will send you the trouble-shooting guide to fix the issue, or to narrow down which of the component(s) need to be replaced. If the issue still exists, we will ask you to send back the defective items to be replaced.
3. Please send the returned item as instructed, along with claims and a telephone number where you can be reached.
4. After the returned item(s) have been accepted and inspected, we will issue a refund or replace the items ASAP. For refunds, item(s) must be sent to XKGLOW within 14 days from date of purchase. Original shipping charges are not refundable.

We always stand behind our products and are committed to our customers! For questions you may have, please contact [xk@xkglow.com](mailto:xk@xkglow.com). We normally respond within 24 hours. (Monday-Friday).

## Tech Specs & Functions:

1. **Module max output:** 60w.
2. Compatible with all XKchrome and XKGLOW 7 color lighting.
3. **The module provides the following unique functions:**
  - a. **Turn signal:** When the yellow wire is activated by turn signal, the lights connected to the module output will blink with turn signals, with or without the accent lighting being turned on.
  - b. **White light:** Similar as yellow wire, when the white wire is activated, the connected lights will change to solid white. The white sensor wire can be attached to various signal sources such as headlight, reverse light, or door courtesy light for different purposes.  
**Note:** Both white and amber wires should be attached to 12V + wire of the source.
  - c. **60w power amplifier:** Even if the yellow and white wires are not used or activated, the module can serve as power amplifier for the lights connected to it. The lights will get main power from the red & black wires of the module and only draw a small amount of power from XKchrome controller as control signal, which enables larger scale installation that exceeds the 72w output of XKchrome controller.

## Mounting Instructions

1. **Test all components before mounting:** As shown below, connect the lights and wires to test if all the lights can be correctly controlled by both XKchrome controller and the yellow and white sensor wires. If there is any issue, please contact our customer service department and we will help you.

2. **Plan mounting locations:** Find a dry and secure location to firmly mount the control module. Securely attach the wires to various sources and apply proper insulation.
3. **Secure all wires and connectors:** Neatly mount and hide any loose wires. Use provided 3M tape to tape every connector together. Make sure the wires and light tubes are not touching anything hot or located on moving parts.

Attach 3M tape to the back of both plugs
